

David S. Finn, MD

Member, Board of Advisors

Dr. David Finn serves as the Medical Director for both Mass General's Concierge Medicine and Executive Health Services practices, where he brings sound leadership, a gentle bedside manner and an innovative approach to Primary Care in his practice. Dr. Finn graduated from Tufts University School of Medicine, completed his residency at Mass General in Internal Medicine and began his career as a full-time clinician, in addition to precepting residents and teaching medical students.

David has a special interest in care design, which evolved as his administrative and practice leadership roles grew. He believes deeply in the continuity model of care, which led to his role as the Director of the McGovern Service, and which supports the ability for outpatient physicians to continue to actively care for their patients in the hospital, working collaboratively with both the teaching and hospital medicine services. In 2019, Dr. Finn was recognized as the inaugural incumbent of the Gill and Allan Gray Family Endowed Chair in Internal Medicine.

David joined the Board of Advisors in May 2024, after several years of service on GBFB's Innovative Development Council.
